

# NGUYEN THAI NGUYEN

Software engineer

Phone: 0939205421 | Email: nguyendragon2000@gmail.com

Location: Binh Hoa Ward, Ho Chi Minh City | Date of Birth: 28/04/2000 | [GitHub](#) | [Portfolio](#)

## PROFESSIONAL PROFILE

Software Engineer with 3+ years of experience delivering e-commerce and business applications, alongside freelance full-stack work on web, mobile, and AI-enabled products. Experienced with React, TypeScript, React Native/Expo, Python/FastAPI, REST APIs, PostgreSQL, and Cloudflare Workers/D1. Built applications with authentication, role-based access, user data isolation, and automated tests, and delivered 10+ responsive web applications.

## TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, SQL
- **Frontend and mobile:** React, React Native, Expo, HTML5, CSS3, SCSS, responsive UI
- **Backend and data:** FastAPI, REST APIs, Cloudflare Workers/D1, PostgreSQL, SQLAlchemy, Drizzle ORM, Better Auth
- **Platforms and tools:** Cafe24, Odoo, WordPress, Git/GitHub, VS Code, Chrome DevTools, Figma, Adobe Photoshop
- **Delivery practices:** Reusable components, API integration, unit testing, linting, production builds
- **AI Tools:** CodeX, Claude, Gemini

## WORK EXPERIENCE

### Freelance Software Engineer | Independent Projects

Nov 2025 - Present

- Build full-stack web and mobile applications using React, TypeScript, React Native/Expo, FastAPI/Python, PostgreSQL, and Cloudflare Workers/D1.
- Developed GFT Career Connect AI, a bilingual support automation platform with five-source intake, spam and duplicate detection, priority routing, knowledge retrieval, confidence checks, and human handoff.
- Built NutriVision AI, connecting an Expo mobile app and React admin dashboard to a FastAPI service for meal analysis, food logging, weight tracking, and nutrition insights.
- Implemented AI provider integrations for Gemini and OpenAI through backend services, alongside role-based access, per-user data isolation, image validation, EXIF removal, database migrations, and automated checks.
- Delivered Andar e-commerce updates, including responsive product and campaign pages, image galleries, promotional banners, and product-variant interactions.

### Software Engineer | Amoeba Co., Ltd

Aug 2023 - Nov 2025

- Built and maintained 10+ responsive web applications for e-commerce and business systems using React and modern JavaScript.
- Designed reusable components and scalable page structures to improve consistency, maintainability, and delivery speed.
- Integrated REST APIs and collaborated with backend engineers on checkout, payment, contact-form, and order-completion workflows.
- Customized Cafe24, Odoo, and WordPress interfaces; coordinated with designers, business analysts, project managers, and engineering teams to deliver features across desktop, tablet, and mobile.

## EDUCATION

**Can Tho University of Technology**

**Aug 2018 – Nov 2022**

Engineer's Degree in Information Systems

**KITS (Korea IT School), Vietnam**

**Apr 2023 – Oct 2023**

Full-Stack Java Development Program

Focused on frontend development with React during practical projects.

## PROJECTS

**GFT Career Connect AI** | [GitHub](#) | [Live demo](#)

**Jul 2026 - Aug 2026**

**Tech stack:** React 19, TypeScript, Cloudflare Workers/D1, Better Auth, Drizzle ORM

- Built a bilingual support automation platform for candidates, employers, collaborators, and administrators, deployed on Cloudflare.
- Developed an intake workflow across five sources with spam and duplicate detection, P0-P3 prioritization, knowledge retrieval, confidence checks, and human handoff.
- Implemented D1 data persistence, dashboards, audit history, notifications, and knowledge-management workflows.

**NutriVision AI**

**Aug 2026**

**Tech stack:** Expo/React Native, React, TypeScript, FastAPI, SQLAlchemy, PostgreSQL

- Built a full-stack application with an Expo mobile app, React admin dashboard, and FastAPI service for meal analysis, food logging, weight tracking, and nutrition insights.
- Designed a nutrition workflow combining image-based food recognition with a Vietnamese food catalog, USDA lookup/cache, and confirmed serving weights.
- Integrated Gemini and OpenAI through backend services; added role-based access, per-user data isolation, image validation, EXIF removal, database migrations, and automated checks.

**Andar E-commerce Platform** | [Andar](#)

**Apr 2025 - Jun 2026**

**Tech stack:** Cafe24, HTML5, CSS3, SCSS, JavaScript, Adobe Photoshop

- Turned PSD designs and client requirements into responsive product, product-detail, and campaign pages for desktop, tablet, and mobile.
- Built image galleries, sticky calls to action, promotional banners, and product-variant interactions; refined updates using client feedback.
- Improved page responsiveness by optimizing asset loading and refining DOM structure and CSS.

**Arria USA Website** | [Arria USA](#)

**Sep 2024 - Apr 2025**

**Tech stack:** Odoo, React, JavaScript, HTML5, CSS3/SCSS, Figma

- Built responsive website pages from Figma designs using reusable React components and Odoo custom modules.
- Implemented validated contact forms, email notifications, and spam-prevention measures.
- Collaborated with backend engineers on checkout, payment, and order-completion workflows.

## GV Market E-commerce Website | [Gvmarket](#)

Aug 2024 - May 2025

**Tech stack:** React, JavaScript, HTML5, CSS3, Figma

- Developed responsive home, product-listing, product-detail, about, and contact pages from Figma designs.
- Created reusable product cards, category sections, filtering interfaces, and promotional layouts.
- Worked with business analysts and project managers to refine requirements and deliver updates on schedule.

## Erpia Corporate Website | [Erpia](#)

Dec 2023 - Mar 2024

**Tech stack:** React, JavaScript, HTML5, CSS3/SCSS, Figma

- Developed responsive corporate pages with reusable React components and scalable page structures.
- Improved page rendering and cross-device behavior in collaboration with design and engineering teams.
