

NGUYEN THAI NGUYEN

FRONTEND DEVELOPER | REACT & TYPESCRIPT

0939 205 421 | nguyendragon2000@gmail.com | Ho Chi Minh City, Vietnam

GitHub: github.com/ThaiNguyen2k

PROFESSIONAL PROFILE

Frontend-focused software engineer with nearly 3 years of professional experience delivering responsive e-commerce and business web applications. Strong in React, TypeScript/JavaScript, HTML/CSS/SCSS, REST API integration, and translating Figma or PSD designs into maintainable production interfaces. Experienced in applying AI assistants throughout development while reviewing and validating outputs in Visual Studio Code.

TECHNICAL SKILLS

Core Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, responsive UI

Commerce and CMS: Cafe24, Odoo, WordPress

Backend and Cloud: REST APIs, FastAPI, Python, Cloudflare Workers/D1, SQL, Drizzle ORM

Mobile: React Native, Expo

Developer Tools: Visual Studio Code (primary IDE), Git/GitHub, Chrome DevTools, Bitwise SSH Client

AI and Design: ChatGPT, Claude, OpenAI Codex, Figma, Adobe Photoshop

AI-ASSISTED DEVELOPMENT

- Use ChatGPT, Claude, and OpenAI Codex for requirement breakdown, architecture exploration, code generation/refactoring, debugging, test-case generation, and technical documentation.
- Apply structured prompts and iterative review, then validate generated code in Visual Studio Code through Git diffs, browser testing, linting, production builds, and automated tests.
- Applied AI-assisted workflows while building GFT Career Connect AI and NutriVision AI, covering controlled automation, knowledge retrieval, mobile/web UI, backend APIs, and documentation.

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer | Amoeba Co., Ltd

Dec 2025 - Jun 2026

- Continued delivery for the Andar e-commerce platform, implementing product, detail, and campaign pages from PSD assets and client requirements.
- Built interactive storefront UI including galleries, sticky CTAs, promotional banners, and product-variant interactions; iterated directly from client feedback.
- Improved responsiveness, cross-browser behavior, and page performance through asset-loading, DOM, and CSS refinements.

Frontend Developer | Amoeba Co., Ltd

Aug 2023 - Nov 2025

- Delivered and maintained 10+ responsive web applications for e-commerce and business systems using React and modern JavaScript.
- Created reusable components and scalable page structures, improving consistency, maintainability, and delivery speed across projects.
- Integrated REST APIs and implemented checkout, payment, contact-form, and order-completion flows with backend teams.
- Customized Cafe24, Odoo, and WordPress interfaces and collaborated with designers, BA, PM, and backend engineers across desktop, tablet, and mobile delivery.

EDUCATION AND TRAINING

Can Tho University of Technology

Aug 2018 - Nov 2022

Engineer's Degree in Information Systems

KITS (Korea IT School), Vietnam

Apr 2023 - Oct 2023

Full-Stack Java Development Program | Practical frontend focus with React

SELECTED PROJECTS

GFT Career Connect AI

Jul 2026 - Aug 2026

React 19, TypeScript, Cloudflare Workers/D1, Better Auth, Drizzle ORM | [Live Demo](#) | [GitHub](#)

- Built a bilingual, multi-role support automation platform for candidates, employers, collaborators, and administrators, deployed on Cloudflare.
- Designed a controlled decision pipeline across five intake sources for spam/duplicate detection, P0-P3 prioritization, knowledge retrieval, confidence gating, and human handoff.
- Implemented Cloudflare D1 persistence, real-data dashboards, audit history, notifications, and knowledge-management workflows.
- Verified 64/64 unit tests, linting, and production builds across 12 routes; published a working live demo and documented the architecture and deployment process.

NutriVision AI

Aug 2026

Expo/React Native, React, TypeScript, FastAPI, SQLAlchemy, PostgreSQL | *Personal project - private repository*

- Built a full-stack monorepo spanning an Expo mobile app, React admin dashboard, and FastAPI service for meal analysis, food logging, weight tracking, and daily/7-day/30-day nutrition insights.
- Implemented a source-aware nutrition pipeline that separates visual food recognition from nutrient calculation using a Vietnamese food catalog, USDA lookup/cache, and confirmed serving weights.
- Created provider abstractions for Gemini, OpenAI, and mock vision flows while keeping external credentials and model calls on the backend.
- Added MIME validation, EXIF removal, RBAC, per-user data isolation, migrations, and automated test/type/lint checks.

Andar E-commerce Platform

Apr 2025 - Jun 2026

Cafe24, HTML5, CSS3, SCSS, JavaScript, Adobe Photoshop | [andar01.cafe24.com](#)

- Converted PSD concepts into production-ready product and campaign pages with responsive layouts for desktop, tablet, and mobile.
- Developed interactive merchandising UI and improved asset loading, DOM complexity, and responsiveness for ongoing seasonal releases.
- Worked directly with client, design, and marketing feedback to revise UI/UX and rapidly publish promotional and seasonal campaign updates.

Arria USA Website

Sep 2024 - Apr 2025

Odoo, React.js, JavaScript, HTML5, CSS3/SCSS, Figma | [arriausa.com](#)

- Developed the frontend from Figma designs with reusable React components and Odoo custom modules, including responsive page structures and dynamic contact forms.
- Collaborated on checkout, payment, and order-completion flows and refined component rendering to reduce redundant re-renders.
- Implemented frontend form validation, email-notification workflows, spam-prevention measures, and cross-browser responsive behavior.

GV Market E-commerce Website

Aug 2024 - May 2025

React.js, JavaScript, HTML5, CSS3, Figma | [gvmarket.vn](#)

- Developed responsive home, product-listing, product-detail, about, and contact interfaces from Figma designs with a consistent cross-device experience.
- Created reusable product cards, category sections, filtering UI, and promotional layouts while standardizing component and styling structure.
- Worked with BA and PM stakeholders to refine business requirements and deliver new UI features on schedule.

Erpia Corporate Website

Dec 2023 - Mar 2024

React.js, JavaScript, HTML5, CSS3/SCSS, Figma | [erpia.net](#)

- Developed responsive corporate pages with reusable React components and scalable layout patterns.
- Improved rendering performance and delivered cross-device UI updates with design and backend stakeholders.
